PURPOSE BRED STAGS WITH
TROPHY/SIRE BLOODLINES

Friday 10th January
@ 4:30pm

273 McKeown Road, Woodbury, Geraldine
Viewings from 3pm
Hot ham buns to follow sale

For a personal viewing prior to sale day contact
Kelly on 0274 324215

www.deergeneticsnz.co.nz

A Warm Welcome!

As you will see in this catalogue, we are transiting away from selling 2 year sire stags into selling 3 year stags. As the last remaining breeder marketing 2 year stags we have decided to take the plunge into 3 year olds.

In order to keep up the cash flow as we transition, we have decided to offer a selection of our sire stags.

The transition to 3 year olds will enable you the purchasers to view our stags comparable to others. We have always (and will continue to do so) assessed our herd based on 2 year antlers. We have our KPIs for span, main beam, points etc and believe our style of early maturing attractive antlers bear testament to these assessment parameters.

We won't be able to have the antlered stags in the selling arena (like previous years) as they physically won't fit. Instead, we will have a series of photos and videos during the sale and the stags will stay in the viewing pens.

We have been focusing for the last while on the visual appeal of our antlers. Focusing on strong 20 plus inch T1's, 2's and 3's, outward flowing crowns and injecting width into everything we have. You will see in the sires on offer like Archios, Fanghu and 8050 what style of antlers we have been trying to create.

As the trophy market matures, the all-important hunters are developing a keen eye for the type of trophy animal they are wanting to harvest. I believe style rules supreme.

You will see we are selling some of our White Deer Genetics. We have on offer one of our 5 year old sire stags, 9168/19 along with 3 white yearling females and a selection of White Deer Genetics semen. We are setting up to be able to offer 3 year old white sire stags starting next year.

Fingers crossed velvet has started trading more freely come the 10th Jan.

As always thanks to our crew here at Deer Genetics, without them, we wouldn't be here today.

And remember back yourself, bid up and buy!

Our pet deer Pixie and her baby 'Popcorn', the newest addition to her family!

Conditions of Sale

1. The sale will be conducted by Deer Genetics NZ Ltd.
2. Each lot becomes the purchaser's property and risk at the fall of the hammer.
3. Warranties and Insurance are covered under separate headings.
4. Terms are strictly cash unless prior arrangements are made with the auctioneer/vendors. Accounts not paid within 14 days of sale shall bear interest, at current rate per annum from the date of sale.
5. The sale is conducted exclusive of GST.
6. A buyers commission of 4% is payable to non-participating companies and recognised independent agents introducing and accompanying purchasers to the sale providing prior arrangements [No later than 24hrs prior to sale] are made with Deer Genetics NZ Ltd or the Auctioneer.
7. Intending purchasers are required to register with the auctioneers prior to the commencement of the sale.
8. No animals, embryos or semen sold by Deer Genetics NZ Ltd, any subsequent progeny or germplasm, including the semen and germplasm of that progeny, may be supplied to any third party without the written permission of Deer Genetics NZ Ltd. This condition does not affect normal commercial deer farming or stud farming or their normal sales of semen or embryos as it only applies to entities with the primary function or commercial semen/germplasm activity.

In addition, any sales of any animals, embryos, germplasm or semen sold by Deer Genetics NZ, that the purchaser agrees to include the following clause as a condition of any subsequent sale of any animal, embryo, semen, germplasm or subsequent progeny or germplasm to a third party – "the purchaser acknowledges that it will not supply any animals, embryos, semen or germplasm to any commercial semen/germplasm marketing or sales entity, and will ensure that this clause is inserted as a condition of any sale of any animals, embryos, semen or germplasm."

DNA Verification

Our whole herd is DNA tested.

Insurance

Insurance will be available from FMG on the day.

TB Status

DGNZ has a clear C10 status. Last test May 2024

ARCHIOS DG – 0022/20

Scan QR code for 2023 video

As a 2-year-old, Archios DG scored 417 with an even 21 x 21 points, 28-inch span, 30.4-inch main beams and 15-to-19-inch T1's, 2's and 3's. This stag has a real dominant presence about him and when you enter a paddock, his head is the first you are drawn to.

Archios DG 02/12/24 @ 4yrs

Archios DG 607 @ 3yrs

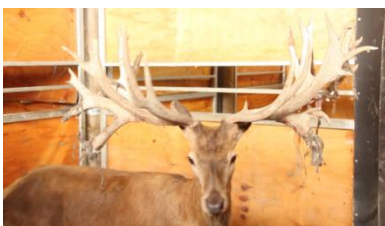

Archios DG 02/12/24 @ 4yrs

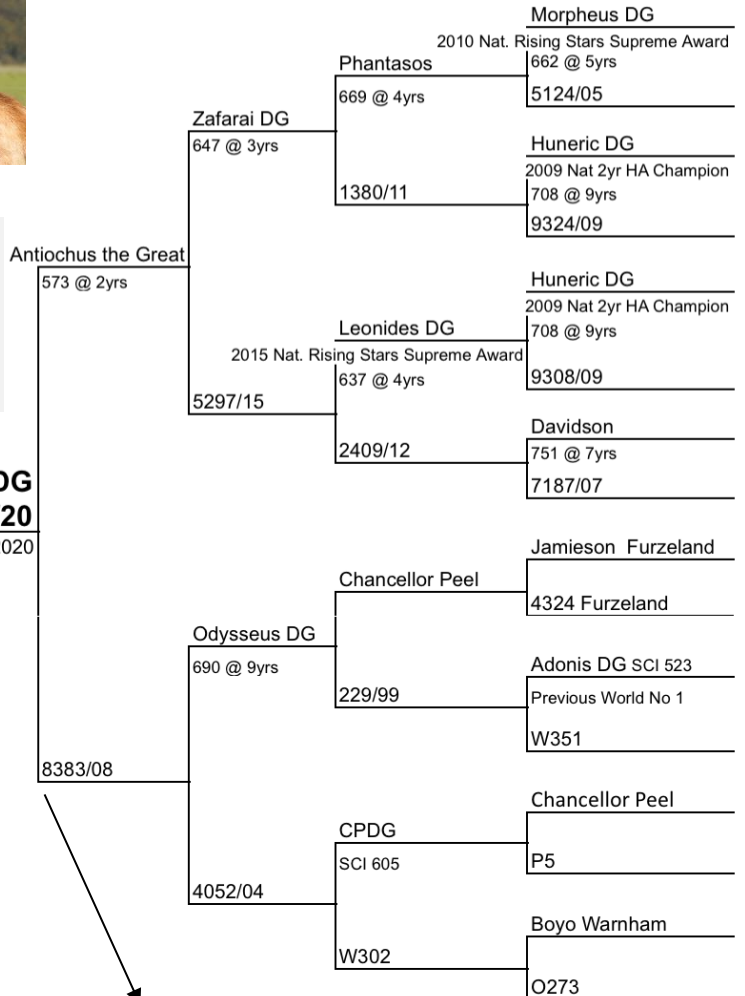

As a 3-year-old, Archios DG Jumped close to 200 inches scoring 607 with 27 x 23 points, 33-inch span, 34-inch main beams and 18-to-24-inch T1's, 2's and 3's. Massive width, awesome visual appeal. This stag will have a lasting impact in our red deer trophy breeding enterprise.

Antiochus the Great DG 573 @ 2yrs
(Archios DG's Sire)

This is a picture of Archios DG @ 2yrs shedding his velvet in the shed Feb 2023. You can see how his tips have sharpened off compared to the pictures of him growing above.

Archios DG's dam is a proven top quality hind. She produced 1181/11 pictured above, our top priced stag in our 2014 sale.

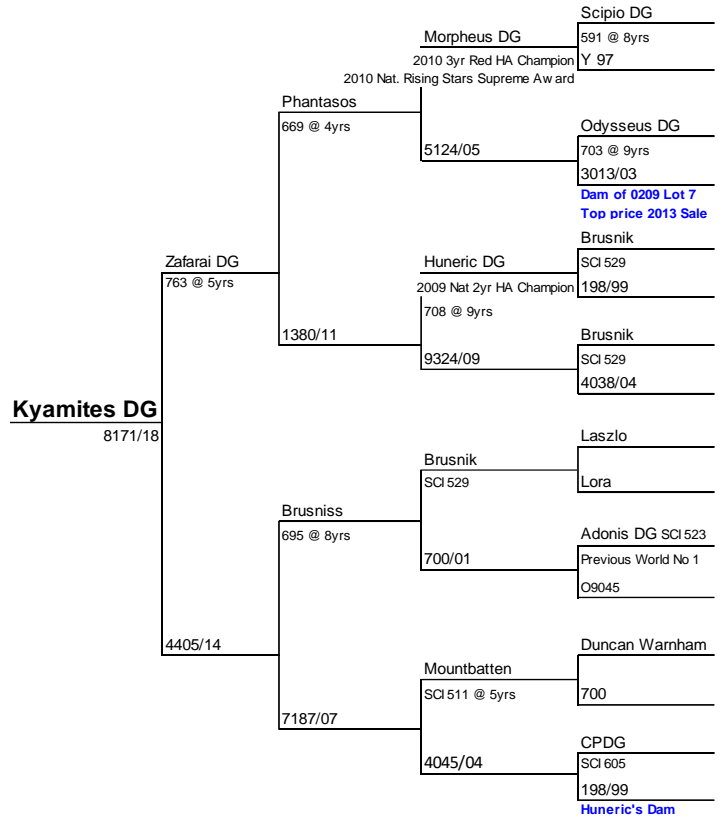

KYAMITES DG

Kyamites DG scored 466 @ 2yrs with 23 x 22 points. Massive antler structure on this young stag. Last year at 3 years old he scored 614 with 32 x 25 points, 36 inch main beams and 20 to 22 inch T2's and T3's. Kyamites DG's pedigree is stacked. All four dams on the bottom line have produced either sires for us or sires we have sold through auction. Massive antler structure and his sons are clearly inheriting his head mass.

Kyamites DG 614 @ 3yrs

ANTIOCHUS THE GREAT DG

We call this monster "Antiochus the Great" He is a rock star. Our highest scoring two year old by a massive 94 inches! The data and measurements we have been recording tell us that 14 inch T1s at 2 years old will be 20 inch T1s by the time they are 5 years old. Don't miss your chance to get his genetics in your herd.

EPIMETHEUS DG

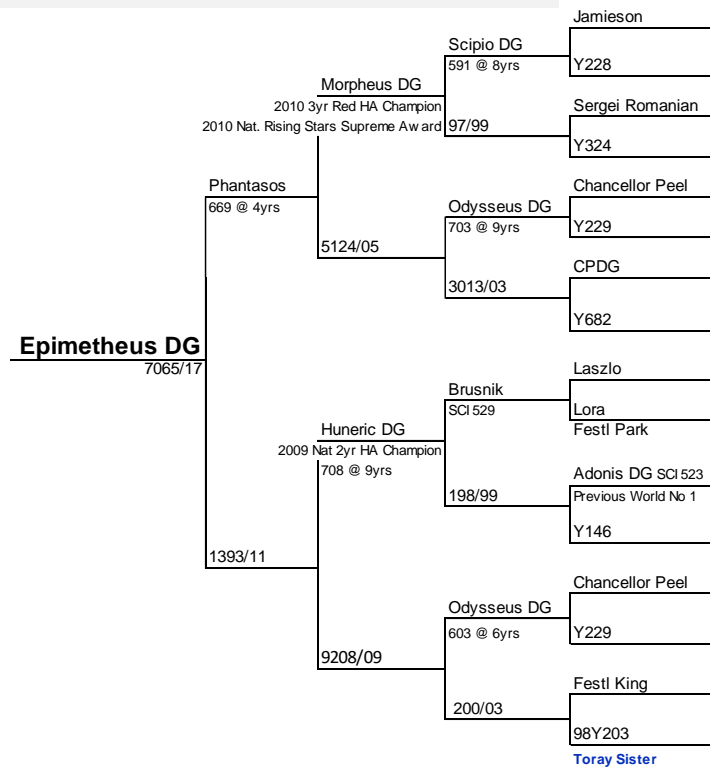

Epimetheus DG is a full brother to what was our biggest scoring 2yr old at the time, Prometheus DG, 479 @ 2yrs back in 2016. Epimetheus DG has over taken his brother by 51 inches scoring 530 @ 2yrs with 27x36 points. Huge scoring pedigree in Prometheus with sire Phantasos DG 669 @ 4yr old, Huneric 709 @ 9yr old, and Odysseus scoring over 700. As a 2yr old, Epimetheus had a massive T1 of 17 and 17.4 inches. T2 on left is 21inches. BothT3s split 6 ways with T4 on the left splitting 8 ways and on the right an awesome 12 way split, totalling 86 inches on his right T4 alone.

Epimetheus DG @ 3yrs

Epimetheus DG 530 @ 2yrs

Lot 1 Tag: TOMMY DG - 0111/20

Tommy DG is a Lot 1 stag over a Zafarai DG daughter. Tommy DG also exhibited exceptional performance, scoring an impressive 512 at just 2 years old and 28 x 25 points. At 3 years old, Tommy DG scored 800 and won the 2024 National 3 Year Old Red Deer Hard Antler Competition. Tommy DG's grand dam, 5251/15, is the dam of 0050/20 who scored 530 at 2 years old, further highlighting the strength of this impressive genetic line. At 4 year old Tommy DG is a monster, massive beam, lots of points, big bodied and cruisy as.

Tommy DG 512 @ 2yrs

Tommy DG 04/12/24

Tommy DG 08/12/24

Tommy DG 800 @ 3yrs

Tommy DG won the 2024 National 3 Year Old Red Deer Hard Antler Competition, scoring 714 not including span or burr measurements.

Imbrius DG 702 @ 5yrs

Morpheus DG 662 @ 5yrs

Lot 2 Tag: 8050/18

8050/18 was an outcross sire for us. He has a different top line to what we normally use, but his bottom line is rock solid. We have embryoed his mother 5384/15, his grandmother 3601/13, his great grandmother 0310/10 and his great great grandmother 3013/03. That's 4 generations of targeted embryo programmes! You could say 8050/18's journey started a long time ago.

8050/18 was used by us as a 2-year-old, we then didn't use him again until he was a 4-year-old. He must have responded to the work. We used him hard out as a 5-year-old. He probably needed an extra year to mature as he has a fair percentage of Eastern genetics in him which can take time to develop.

41- and 42-inch main beams on 8050/18 as a 5-year-old. Scoring 660 with 20-inch T1s and 2s. 24- and 27-inch T3 s. Crown points of 13 to 18 inch and a 37.4-inch span. Great looking stag with everything in the correct place.

If possible 8050/18 is wider longer and more attractive this year. Remember its not all about the score, it's a style thing!

Lot 3 Tag: 9168/19 WHITE STAG

9168/19 is one of our White Deer Genetics sire stags. We decided to begin releasing our white deer genetics into the market. We sold 2 pedigree white hinds in our last hind sale back in August and are planning to be marketing 3 year old white sire stags next year.

9168/19 has a great style of antler, awesome width with clean beam, great BBT's. Awesome pedigree as we have managed to inject 2 of our most prolific trophy producing reds, being Phantasos in the sire side and 3013/13 in the bottom line into the pedigree of 9168/19.

Lot 4 Tag: FANGHU DG – 0131/20

Fanghu DG is a Utopia DG over a Prometheus DG Dam. Utopia DG scored 497 @ 2yrs and Prometheus DG scored 479 @ 2yrs. Fanghu DG scored 483 @ 2yrs surpassing both these prominent DGNZ sires at the same age. Grand dam 7248/07 is one our best dams, having produced Genghis DG who scored 528 @ 5yrs, Imbrius DG who scored 800 plus @ 6yrs, 3386/13 lot 3 in our 2017 sale and Hypnos DG who scored 458 @ 3yrs. Great grand dam 553/00 produced Hannibal DG who scored 536 @ 5 yrs which was just massive for his time. As a 2-year-old Fanghu DG scored 483 with 24 x 22 points, 27-inch span and 28.4-inch main beams. His crown points on left side had 10 points over 5 inches in length. As a 3-year-old Fanghu DG scored 597 with 24 x 25 points, 30.4-inch span and 33.4-inch main beams. He has T4's left and right totalling 44.2 inches on his left and 69 inches on his right.

As you would expect Fanghu has more points and is wider and longer than last year. Very similar in style to Genghis see photo below. Stags that score in excess of 27 inches at 2 year are hard to come by. We have been using stags like Fanghu as width builders within our trophy herd

Lot 5 Tag: PLUTUS DG – 1082/21

Plutus DG was elevated from our B mob into the A mob quite late during his antler growth last year as a 2 year old. As a result his antlers looked to be under done. It hasn't affected his structure or style, but his crown tips didn't finish off. However, given that he still pumped out a 435-inch head with 25 x 26 points and a 22-inch span. 13-to-18-inch T1's, 2's and 3's. Mutli T3's with an 8 way on left scoring a combined 51.4 inches and a 7-way T3 on right scoring a combined 31.2 inches. We used Plutus DG hard out ourselves this last rut, not only because of his antler style and structure but also because he is a half-brother to Pleistarchus DG who this year was hunted at 5-year-old and scored 800 plus. Pleistarchus was a Cleomenes DG over 6322/16 whereas Plutus is a Jacksson DG over 6322/16. Due to Plutus DG late elevation into the A mob we haven't been able to find any photos of him wearing his antlers at 2 year. Later developing like Donald Wallace due to mating work load. He will be magnificent come sale day. The first crop of Jacksson 2 year sons last year were spectacular. With the 2 we offered being in the 3 top priced stags selling for 30k plus.

Lot 6 Tag: DONALD WALLACE DG - 1004/21

Donald Wallace DG is a Zafarai DG over dam 4308/14. Dam 4308/14 goes back to Super Dam 3013/03 who is on the bottom line of so many of our high-end sires and dams. Dam 4308/14 is a full sister to Hilderic (Sire of Cleomenes) and Archontas. Big mass on Donald Wallace DG 2-year head, scoring 541 with 30 x 33 points. Yep that's a 63 point 2 year old. 12-to-19-inch T1's, 2's and 3's. 8-way T3 left with a combined 55 inches, 5 way T3 right with a combined 42 inches. 6-way T4 left with a combined 43.3 inches. Racking and stacking the points and score.

Donald Wallace is slower developing this year due to work load last roar.

Come sale day he will be at his best!

Lot 7 Tag: 1129/21

1129/21 is sired by Aidos who we used as a 2 yr old. Interesting to note Aidos and 8050/18 lot 2 in this catalogue share the same maternal grandmother 3601/13. Going to be a big stag this one. Antler comments are massive BBT's huge crowns developing, kickers off crowns multi outward flowing T4's developing. Some history in the dam line with Gran dam 9272/09 producing 5226/15 in our 2018 stag sale.

Jack DG 668 @ 5yrs

Phobetor DG 740 @ 5yrs

Lot 9 Tag: 1161/21

1161/21 is a Jack DG son from a full sister to Tommy DG dam. 3 sire and sale stags from dam 9396/19 her sister 7261/17 and the grand mother 5251/15. Pedigree is anchored by 6161/06, long way back in the pedigree tree but it matters. 1161/21 is from a first calving hind. Antler comments when in the shed for assessing were; very good beam, extra large T1's, 2's and 3's, outward flowing crown developing. Big heavy head. Pretty much sums up most of the young stags we offer for your perusal lately.

Lot 11 Tag: TALCOM DG

5x Semen Straws Available

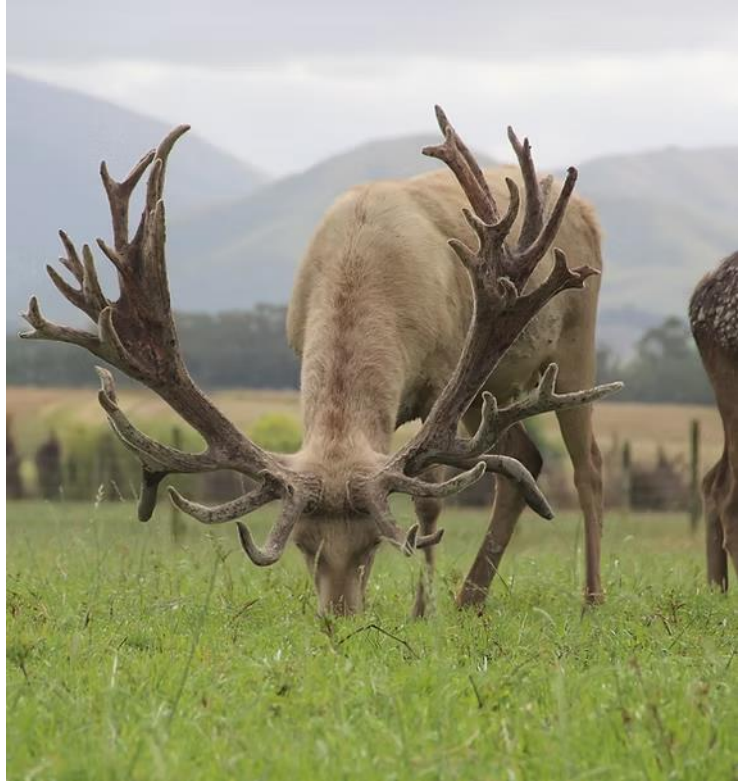

As part of our plan to release our white deer genetics we are selling 5 straws of our king pin white sire Talcom DG. Bred by Janey Hayes and purchased when we brought the Lochinvine white herd some 8 or so years ago Talcom DG has been a standout from the get-go.

Scoring 630 at 5 year makes him the largest white stag bar none. His pass on factor for the white gene is unsurpassed. Semen has been collected and is stored at Xcell breeding services in Woodend. Semen count is as follows. Batch 70/19(-) Packed at 40mil, Post thaw 60.4, Incubation 55.4

DNA reference number is 1956410 tag 3420/13

PURCHASER: _____ PRICE: _____

Lot 12 Tag: SNOW

2x10 Semen Straws Available

Foundation white genetics here. Offered for sale are 2 x 10 straw parcels of white stag Snow. I believe Snow was one of the original imports from Denmark. Straight from the Royal Danish White Red deer herd. Independent evaluation has been done on the straws which is inserted into this catalogue on the next page.

PURCHASER: _____ PRICE: _____.

Lot 13 Tag: OLLY

2x10 Semen Straws Available

Foundation white genetics here. Offered for sale are 2 x 10 straw parcels of white stag Olly. We know nothing about Olly other than he is in the background of the pedigrees in our white deer genetics herd including Talcom DG. Independent evaluation has been done on the straws which is inserted into this catalogue on the next page.

PURCHASER: _____ PRICE: _____.

Evaluation report

This report contains the results of the CASA performed for the requested batches of semen for the Stags:

- Lochinvine Olly B59
- Snow Y315

The CASA percentage below is given in progressively motile sperm as a percentage of the total sperm analysed. The abnormal sperm is also given as a percentage of the total.

Visual analysis is performed by a technician examining the semen under a phase contrast microscope and estimating the approximate progressive motility of the sample. CASA analysis is performed using a Minitube AndroScope CASA.

Note: The Minitube AndroScope CASA does not have an explicit calibration setting for Cervine semen. This semen has been put through the AndroScope CASA using the calibration setting for Bovine semen, as both Bovine and Cervine semen are typically packed at similar concentrations in the straws.

Bull	Batch	Concentration (million per straw)	Visual Analysis (%)	CASA (%)	Abnormals (%)	Notes
Lochinvine Olly B59	141-99	23	>60%	64.17	Negligible	NA
Snow Y315	62-94	23	>60%	67.18	Negligible	NA

Based on both the visual analysis and the CASA reports for both of these straws, I would conclude that these straws both contain good-quality semen. As stated above, the AndroScope CASA does not have a specific calibration setting for Cervine semen, however as both the CASA and visual analysis agree that both samples are above 60% progressive motility, I consider this to be sufficient evidence that these samples are of high quality.

ASK US ABOUT CUSTOMISED DEER FENCING

Possible customised configurations:

- Customised Line Wires
 - 11 – 20 Line Wires
- Customised Heights
 - 1550mm (6'") – 3048mm (120'")
